Paper

Our research and findings

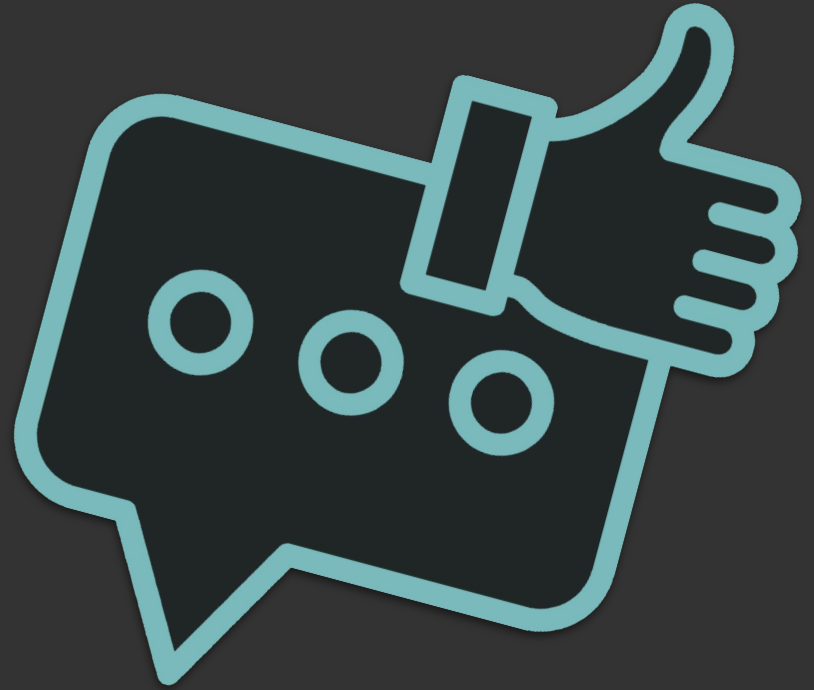

Our Thesis:

“Microsoft managers maintain motivation, set goals, and design successful teams through giving constructive feedback, using the outcome perspective for goal setting, ensuring the best people are hired into the right roles, and leading with empathy.”

Feedback

- By knowing **the surrounding environment** and **themselves**, people can perform better in their teamwork so that the team will become more successful.
- The way to **receive feedback** is crucial

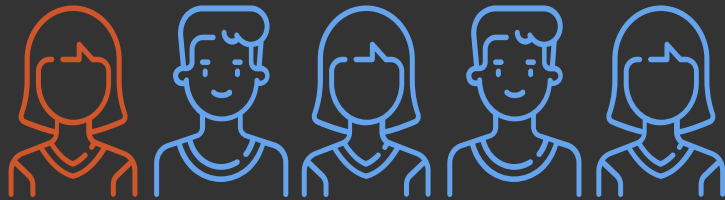

The Outcome Perspective

- Setting **SMART short-term goals** in order to achieve a desired long-term outcome
- Allows people to not only focus on the task, but also the **benefit of the task**
- Use this perspective to consider **stakeholders**

Stakeholders:

Best Talent in the Right Roles

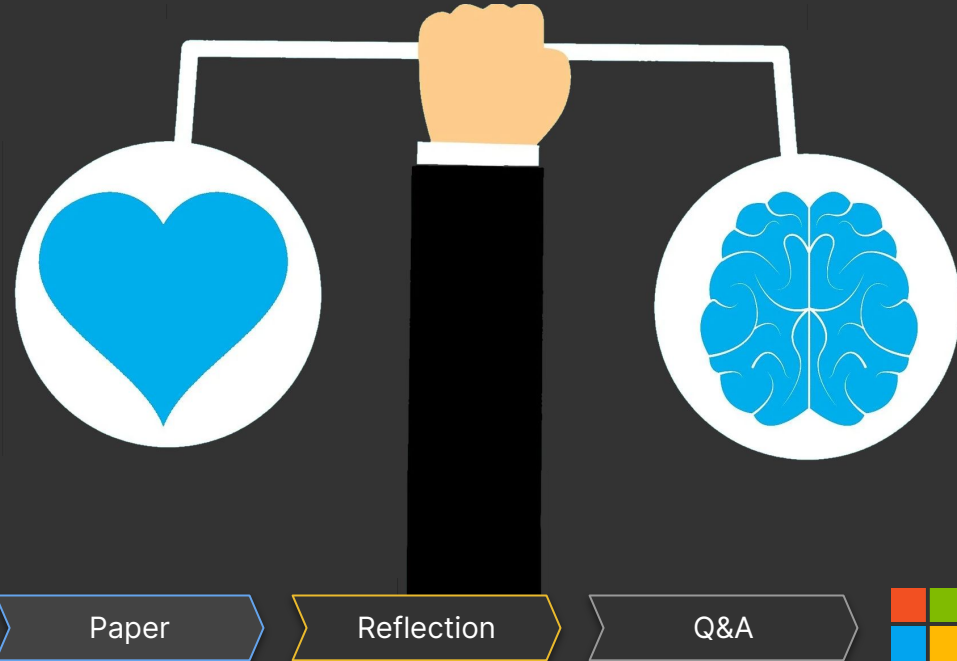

1 in every 5 people are in the wrong role

The wrong roles are roles where employees:

- Feel **unmotivated** by their work
- Are **not engaged** with their work
- Positions they are **not productive** in

Empathy

- **Understand personal lives** to tailor specific goals for individual contributors
- **Build trust** to raise team cohesiveness and productivity
- **Increase genuine feedback** to maintain long term gains and promote further improvement
